Technical skills

PROGRAMMING STYLE & PHILOSOPHY:

Intentional, Hand-Crafted Code: Dedicated to writing deliberate, optimal, and clean code, completely avoiding unreliable auto-generated shortcuts.

Strict Standards & Architecture: Adhering strictly to PSR-12 standards and Object-Oriented Programming (OOP) utilizing MVC patterns.

Core Engineering Principles: Deeply rooted in TDD, DRY, SRP, OCP, and KISS methodologies.

Modern Delivery: Championing an API-first and Mobile-first development approach.

Languages:

PHP (V5.6 – 8.5)	23 y	Expert
JavaScript	14 y	Advanced
Bash	7 y	Advanced
Python (V2.7 – 3.7)	7 y	Intermediate
HTML5 & CSS3	25 y	Expert
SASS & LESS	18 y	Advanced
XML & JSON	17 y	Advanced
GO (V1.0 – 1.2)	1 y	Basic
C++	1 y	Basic
C#	1 y	Basic

PHP Frameworks:

Laravel (v4.2 – 13)	12 y	Expert
CodeIgniter (v2.0 – v3.1)	4 y	Advanced
CAKEPHP (v3.5)	2 y	Intermediate
Yii 2 (v2 – 3)	2 y	Intermediate
SYMFONY (v2.0-v2.2)	2 y	Novice

JavaScript Frameworks:

Vue.js (V2.1 – 3)	8 y	Advanced
jQuery (v2 – v3.3)	5y	Advanced
Angular (v3.5)		Basic
React (v2.0-v2.2)		Basic
Node.js (V2.7 – 3.7)		Novice

CSS Frameworks:

I blend the efficiency of Tailwind or Bootstrap with a deep comfort in writing custom CSS, SCSS, and animations to build web experiences that are both scalable and unique.

- Mobile-First Design.
- Flexbox & CSS Grid.
- Utility-First CSS.
- Modular Architecture.

Bootstrap (v3.0 – v5.4)	13 y	Expert
Tailwind (v3.0 – v4.0)	4 y	Intermediate

Version management:

GitHub		Advanced
GitLab		Advanced
BitBucket		Advanced

Server Technologies:

Good knowledge and confident usage the following:

- DigitalOcean & AWS Ecosystems
- Cloud infrastructure and orchestration systems
- Microservices and scalable infrastructure
- Linux based servers. (hardware and software.)
- CLI tools, SSH, VPN, certificates, ciphers, RSA keys
- Cron and Bash scripts automatization
- Confident use of LAMP & LNPP Environment
- Very High Security Standards (Encrypted HDD's / VPN / SSH / etc.)
- FTP / SFTP, samba, TS, SMTP, SSL / OpenSSL, media & game servers, VPS, GRID

Linux - Ubuntu (v16 – v24.04)	19 y	Advanced
Apache Web server (v2.4)	19 y	Advanced
Nginx (v1.22)	19 y	Advanced
PHP (v4.3-v8.3)	19 y	Advanced
MySQL (v3.5)	19 y	Advanced
PostgreSQL (V2.7 – 3.7)	5 y	Advanced
Docker	4 y	Advanced
Kubernetes	3 y	Intermediate
AWS ecosystem	2 y	Intermediate

Knowledge Level:

Bas.	Basic	Fundamental knowledge
Nov.	Novice	Limited experience
Int.	Intermediate	Practical application
Adv.	Advanced	Advanced Knowledge
Exp.	Expert	10.000h+ in the field

Contractor – Freelancer

VARIOUS INTERNATIONAL COMPANIES / HUNGARY, GERMANY, IRELAND

From: 2023 Feb to Present

RESPONSIBILITIES:

- **Define** technical roadmaps and **architectural blueprints** that align long-term business goals with scalable software solutions.
- Oversee the **end-to-end SDLC**, from initial stakeholder requirement gathering to final production deployment and monitoring.
- Design and maintain **cloud-native infrastructure** using Infrastructure-as-Code (IaC) to ensure environment consistency and security.
- Architect and develop **enterprise-grade web applications** utilizing **PHP** and the **Laravel** framework, adhering to modern design patterns and PSR standards.
- **Optimize** backend performance, database schemas, and caching layers to ensure high availability and seamless data handling for complex web systems.

WORTH TO MENTION:

- Reduced deployment frequency from weeks to minutes by engineering a **robust CI/CD** pipeline and automated testing suite.
- Successfully migrated a monolithic legacy system to a **microservices architecture**, resulting in a 40% increase in system throughput.
- Achieved 99.99% system uptime by implementing proactive observability, automated failovers, and self-healing infrastructure.
- Engineered **high-performance PHP/Laravel solutions** that streamlined business workflows and significantly improved response latencies.
- Authored and maintained open-source Python plugins.

Chief Technology Officer (CTO)

CREATIVE COLLISIONS LIMITED / DUBLIN - IRELAND (IE)

From: 2020-09-01 - 2023-02-01

RESPONSIBILITIES:

- Create a complete ecosystem of Duty, VAT, and Tax calculation
- Supervise an AI engine development
- Oversee the company's other major projects (PostLocal, IOSS)
- Oversee company property, security, source code, and other valuable possessions.
- Implement industry standards in development processes
- Maintain the old system, while improving the code standards
- Hire new developers and create the Hiring process
- Mentor and tutor other developers and staff
- Creating, refining, and maintaining company processes and ceremonies
- Creating release versions and maintaining release schedules

WORTH TO MENTION:

- Planned and delivered the company Main Project, a complete ecosystem of RESTful API Microservices, with Single-Sign-On (SSO), Modular infrastructure, Docker containerisation, and Kubernetes or AWS Orchestration. Designed to be scalable HORIZONTALLY and VERTICALLY.
- Introduced and trained employees to Modern Frameworks Like Laravel, Vue.js.
- Introduced Git Releases & CI – DC pipelines
- Added Jira flow integration to Git development cycle
- Defined Coding standards inside the company
- Created Developer documentations and user guides

Software Engineer & SysAdmin

IMMERSIVE VR EDUCATION / WATERFORD - IRELAND (IE)

From: 2018-05-01 - 2020-03-01

RESPONSIBILITIES:

- Plan and deliver company requested features to the application.
- Develop API endpoints (RESTful) and third-party API integrations.
- Develop Front-End & Back-end components.
- Develop PHPUnit tests.
- Code review and code delegation.
- Develop CI – CD pipelines.
- Deploy and secure LNPP & LAMP stack environments.
- Maintain the server park.
- Mentoring other developers.
- Make documentation.

WORTH TO MENTION:

- Introduced Test Driven Development (TDD) to the company.
- Introduced a secure way to share passwords with developer groups. (Passbolt)
- Built the initial design for the website.
- Planned and developed the payment system with STRIPE.
- Helped to build the “rules of development”.

Software Engineer & SysAdmin

NORTH WEB SOLUTIONS LTD / BRISTOL - UNITED KINGDOM (GB)

From: 2015-03-01 - 2022-10-01

RESPONSIBILITIES:

- Develop Company and project management tools.
- Develop Large scale inventories.
- Create CodeIgniter libraries.
- Maintain CRMs.
- Develop Presentation websites.
- Develop Magento 2 websites & themes.
- Create WP themes.
- Develop Android applications.

Worth to mention:

Most of the company's project was under strict NDA, so I can't share many details on the projects what we developed, but in general, we created large scale inventories and management systems, for military and civilian applications.
